Security Override Module	US\$ 950,00	/ € 630,00

Note:

MAXA does not track or store any security keys that you generate.

However, MAXA does have the ability to generate an override key, based on certain machine statistics, components and your serial number. The override key will **ONLY** work on your clients and will **ONLY** be valid for 24 hours.

MAXA can provide this to you as a one-time service, or for a significant charge, MAXA can provide you with a customized Security Override Module so that you may create your own override keys, as needed. Those keys are also valid for only 24 hours.
